

CDL

În loc de epilog

Rezumat

- Curs **de dezvoltare liberă**
- 7 cursuri, 16 studenți
- Lots of sh*t (svn, git, trac, liste, IRC, proiecte)
- Prezentare Andrei Pitiș
- Prezentare Adi Ber
- Un succes?
 - Trainerii și studenții au rezistat până la capăt
 - Feedback is welcome!

What now?

- It's over!
- Is it really over?
- What now?

- **Get involved!**

Why? (fun)

Why? (peer recognition)

Why? (peer recognition (2))

- **MM** always runs in kernel mode
- **MM** can reverse entropy.
- **MM** is short for Messiah's Messiah.
- **MM** created the Xel'Naga.
- **MM** understands transcendence.
- **MM** can handle SIGKILL.
- **MM** has three brains running in RAID5.
- **MM** is the pre-Alpha and post-Omega.
- **MM** can recurse and his stack does not overflow.
- **MM** controls the Internet; he makes us think it's free.
- **MM** will dictate the switch to IPv6.
- **MM** is replenishing /dev/random.
- Git, Bazaar, Mercurial and Darcs are but hooks to **MM**'s ultimate SCM.
- **MM** is the law.

Why? (communities)

- Social networking
- Discuții
- Bere!
- Proiecte, evenimente, acțiuni
- The more the merrier!

Why? (money)

- Training
- Suport
- Companii
- Exemplu
 - Răzvan Deaconescu
 - modest ca întotdeauna
 - A&C, Ixia (projects), P2P-Next (EU-projects), LPI

Where?

- ROSEdu (RSoC)
- ROSDev, Ubuntu-ro etc.
- Proiecte mici
 - NU Linux, OpenOffice, Mozilla
 - Clienți, aplicații grafice, module, plugin-uri
- Proiecte proprii?

How?

- Coding
- Traduceri
- Testare – bug-reports
- Documentare, tutorial
- Discuții
- Marketing/promovare

Ce mai aștepți?

GO!!!

But first

Some prizes!
